

WORK IN THE TEST TEAM

ESTABLISHMENT OF ORGANIZATIONAL STRUCTURES AND SHARING OF TEST DATA FOR MULTI-USER OPERATION

IZYTRONIQ ENTERPRISE

Teamwork is the common feature of the enterprise variants. The software is installed to several PCs which share data in a single database. Depending on the variant, data can be made available online as well as offline. Depending upon requirements, any number of licenses can be purchased for multi-user operation.

IZYTRON **.IQ** PREMIUM ENTERPRISE

- Network-compatibility – connection to an external MS SQL database (server)
- Multi-user operation as floating license model
- Role and rights management for users
- Window designer and data field editor for individualizing the application

IZYTRON **.IQ** ULTIMATE ENTERPRISE

- Data replication (outdoor)

ENTERPRISE Ultimate involves a hardware extension for ENTERPRISE Premium. The license is linked to the hardware of the offline client. Partial data volumes can thus be transmitted from the server to ENTERPRISE Ultimate and processed offline. The required number of outdoor licenses can be freely combined with ENTERPRISE Premium licenses.

At least one ENTERPRISE Premium license is required as a prerequisite.

ENTERPRISE Premium
